

Defibrillators for Retirement Communities, Sporting and Recreational Facilities

Benefits – Easy To Use

- **Intuitive** – Designed for use in public areas by people of all skill levels. Easy-to-follow audio instructions and a visual display to guide users.
- **Easy to Operate** – Only two buttons, ON and SHOCK.
- **Always Ready** – An indicator light flashes to confirm system readiness.

Compact, Light and Durable

- **Compact** – Up to 56% smaller than other PAD/AED's.
- **Light** – Weighs only 1.13kg, making it the lightest in the industry and easiest to carry.
- **Durable** – Resists shock and vibration and carries the industry's highest rating against dust and water (IP56).

Advanced Performance

- **Optimised and Targeted** – Utilises proprietary (SCOPE™) technology to assess heart rhythm and self-adjusts the delivery of energy to prevent unnecessary tissue damage.
- **Critical Data Capture** – Records all event data for 45 minutes once the pads are applied, providing critical clinical information for physicians.

Flexible Pricing Options

- **Rental and servicing options** included in fixed annual fee.
- **Direct purchase** at competitive rates

Responding effectively to Sudden Cardiac Arrest.

Sudden Cardiac Arrest (SCA) can happen to anyone, anywhere, and at any time. But it doesn't have to be fatal – in fact, the faster the response to a cardiac emergency, the better the chances of survival.

HeartSine provides the most user-friendly Public Access Defibrillator (PAD/ AED) on the market with an user interface that actively coaches you through the entire event. The unit is compact, durable and extremely easy-to-maintain making it perfect for retirement communities, sporting and recreational facilities.

Helping to Save Lives

Any organization providing facilities to the public and staff will have to deal with SCA. With today's portable AEDs your employees can now be part of the response and help keep a victim alive in the crucial minutes after SCA.

Sudden Cardiac Arrest – how serious is it?

Time to shock is critical
to survival rate

- Nearly 30,000 people die annually due to a Sudden Cardiac Arrest (SCA); making it the most common cause of death in Australia every year.
- Only 5% of people currently survive SCA nationwide.
- Defibrillation within 3 minutes can increase survival to over 70%.
- Average Emergency Medical Services response times are roughly 14+ minutes.

Increase your chance of survival by installing a HeartSine Public Access Defibrillator.

Saving Lives HeartSine Samaritan PAD success story

In June 2010, a 72 year old woman went into Sudden Cardiac Arrest at her Granddaughter's wedding. The Granddaughter started CPR and in a few minutes she was connected to the PAD. She got one shock immediately and CPR, then another shock around 20 minutes later. She woke up in the ambulance and spoke with the EMS team.

A few months prior to the incident the owner of the hall purchased a HeartSine samaritan PAD and was trained by a local distributor.

About  HeartSine®

A world leader in personal and public access cardiac rhythm management.

HeartSine's mission is to advance the deployment of lifesaving defibrillation therapy in non-traditional areas of care through the development of proprietary technologies and quality products.

HeartSine's samaritan® PAD is a sophisticated, lightweight automatic external defibrillator designed for rescuers of all skill levels and is ideal for public facilities, retirement homes, sports facilities, schools, churches and business.
